SUMMARY

Skill in: HTML, CSS, Django, PHP, Laravel, MySQL, PostgreSQL, MongoDB. Developed some great projects like Laundry Aggregator MVP, Heart Disease Predictor, and Weather data Visualization. Skilled at weaving together technical skill and problem solving to create innovative, user-centered solutions.

TECHNICAL SKILLS

- | | | |
|-------------------------|---|---|
| • Programming Languages | : | Python, HTML, CSS, JavaScript, Php |
| • Machine Learning | : | NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV |
| • Visualization | : | Matplotlib, Seaborn, Tableau |
| • Tools | : | Git, VS code, Jupyter, GitHub, Streamlit, AWS |
| • Databases: | : | MongoDB, MySQL |
| • Frameworks | : | Django, Laravel |

EXPERIENCE

Software Development Intern

C D O E , Periyar University | 15 May 2024 - 23 May 2024

- University Admission Software, Reduced student time when filling application. Vice Chancellor only access the software for managing department head and students applications.
- Developed a responsive front-end interface with HTML, CSS, and JavaScript Four, leveraged MySQL for database management ensuring data integrity and facilitated department related operations.

EDUCATION

Periyar University Salem

Master of Computer Applications

July 2023 - May 2025

CGPA: **8.0**

Government Arts College

Bachelor of Computer Applications

Dharmapuri

July 2020 - May 2023

CGPA: **7.69**

PROJECTS

Weather Data Visualization | Source code

HTML | CSS | JavaScript | Python | API

- Built a web application to visualize weather in real time.
- My network people used and reviewed the app and said 90% working well.
- UI attracted my network people that built using HTML, CSS and Python. I used **latitude and longitude** to find and fetch the real time weather data.

Laundry Aggregator Service | Source code

Laravel | Postgresql

- A Laundry Aggregator MVP with Location-based search functionality built using Laravel and PostgreSQL
- Customer and Store Panels role-based authentication with dynamic CRUD APIs.
- Customers can find nearby store using range and location

Heart Disease Prediction

- Logistic regression gave more accuracy 92% for my data which helped to predict and get result accurately.
- Analysis page helped users to get more visual and understand.
- Recommendations like to do and don't and Doctor appointment is advantage to get help on same site.

CERTIFICATION

- **Joy of computing using python** - Indian Institute of Technology Madras | **NPTEL**

ACHIVEMENTS

- Achieved a 21-day streak solving **Problem of the Day** on GeeksforGeeks, earning a consistency badge.
- Shortlisted for Round 2 of **EY Techathon 5.0** by presenting an AI-driven solution to address real-world challenged.
- Achieved the Standard Milestone in Google Arcade 2024, demonstrated problem solving skills.
